

Optomap Digital Retinal Exam

In our continued effort to bring the most advanced technology available to our patients, Dr. El-Hitamy is proud to announce the inclusion of the Optomap Digital Retinal Image as an integral part of your eye exam today.

Dr. El-Hitamy is concerned about retinal problems including macular degeneration, glaucoma, retinal holes or detachments and systemic diseases such as diabetes, stroke and high blood pressure. These conditions can lead to serious health problems, including partial loss of vision or blindness that often develop without warning and progress with no symptoms.

An Optomap exam provides:

- An eye wellness scan
- An in depth view of the retinal layers (where diseases can start)
- The ability for you to view your Optomap retinal image with your doctor during your exam
- An annual permanent record for your medical file, which gives your doctor comparisons for tracking and diagnosing potential eye disease.

The Optomap exam is fast, easy, comfortable and does not involve drops.

Insurance plans typically do not cover any advanced screening technology beyond the general eye exam. We will be performing the Optomap Retinal Exam as an enhancement to the general eye exam for **\$39**.

_____ I would like to have the Optomap Digital Imaging done and discuss the results with my doctor.

_____ I would like to have my eyes dilated and understand that I may have 2-3 hours of light sensitivity and blurred near vision.

Patient Signature _____ Date _____

**Thank you for coming to our office.
